AMENDED CLAIM SET:

1. (cancelled).

2. (previously presented) The glove according to claim 9, wherein the dip-forming composition contains 0.01-5 parts by weight of the dibenzoyl peroxide based on 100 parts by weight of solids content in the conjugated diene rubber latex.

3. (cancelled).

4. (previously presented) The glove according to claim 9, wherein zinc oxide is added at 2 parts or less by weight based on 100 parts by weight of solids content in the conjugated diene rubber latex.

5. (cancelled).

6. (cancelled).

7. (previously presented) The glove according to claim 9, wherein the other monomer capable of copolymerization with the conjugated diene monomer and the ethylenically unsaturated acid monomer is an aromatic vinyl monomer and/or an ethylenically unsaturated nitrile monomer.

8. (cancelled).

9. (currently amended) A glove obtained by dip-forming a composition obtained by adding a dibenzoyl peroxide to ~~comprising~~ a conjugated diene rubber latex ~~and a dibenzoyl peroxide~~,

wherein the conjugated diene rubber latex is obtained by emulsion polymerization of a monomeric mixture comprising 55 to 81 weight-% of a conjugated diene monomer, 2 to 8 weight-% of an ethylenically unsaturated acid monomer, and 11 to 43 weight-% of another monomer capable of copolymerization with these, using an inorganic peroxide as a polymerization initiator,

wherein the concentration of solids content in the dip forming composition is 20 to 40 weight-%, and

wherein the dip-forming composition contains neither sulfur nor curing accelerator.
